要安装的：

1. Github desktop：https://desktop.github.com/
2. vscode：https://code.visualstudio.com/
3. mdbook (如果需要本地预览修改再安装） https://rust-lang.github.io/mdBook/guide/creating.html

Process for Maintainer

1. 用 `open with 1` clone 到本地

Local | Codespaces
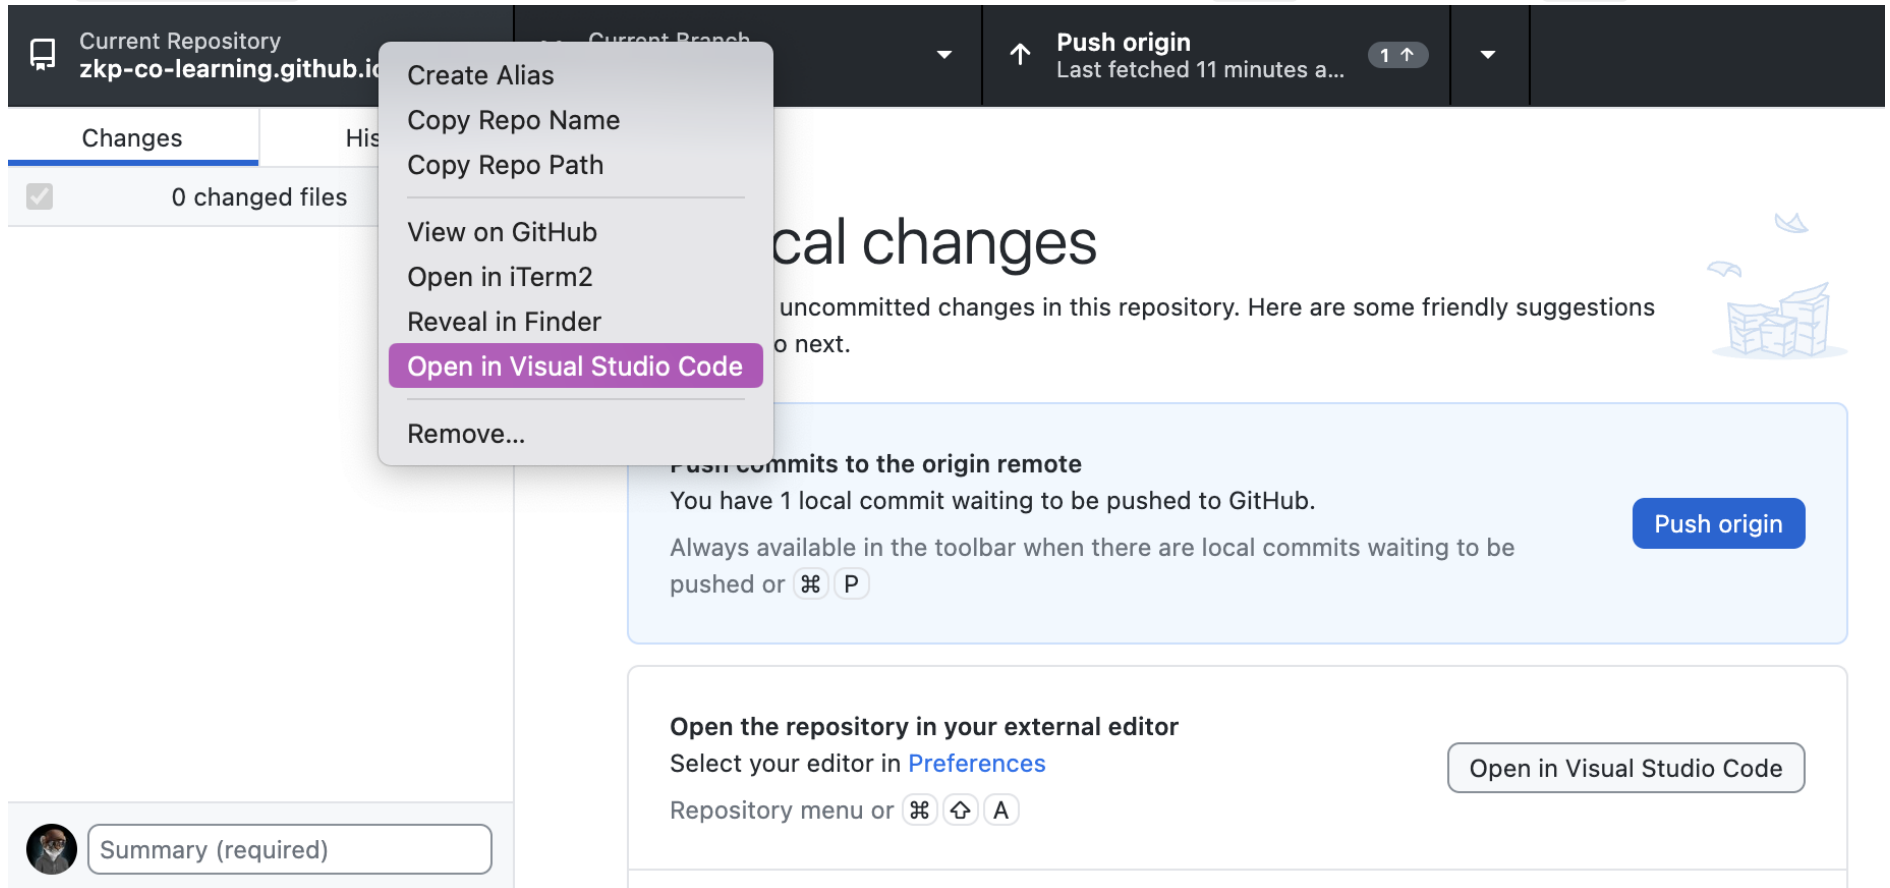

Clone ⑦

HTTPS **SSH** GitHub CLI

git@github.com:zkp-co-learning/zkp-co-lea ⧉

Use a password-protected SSH key.

⤓ **Open with GitHub Desktop**

📄 **Download ZIP**

2. 用 `Open in 2` 进行管理。（或Reveal in Finder直接把新 `.md` 文件拷贝到 `src` 下）

3. 目录是 `src/SUMMARY.md` ，仿照其他格式link to 新加入的文章，或进行其他修改

4. 2里面Souce Control， Commit&Push 上传修改

1. fork this repo and clone it to local machine (choose `for your own use`)
2. copy directy `.md` file into `src` folder
3. In `src/SUMMARY.md` (i.e the structure file of mdbook), add link to your newlly added posts
4. commit and push
5. to make a PR and wait to merge
